PROFESSIONAL SUMMARY

Senior Angular Frontend Developer with 5 years of experience designing and delivering high-performance, scalable single-page applications (SPAs) using Angular (v2–18+), TypeScript, and modern frontend architectures. Strong expertise in performance optimization, micro frontends, accessibility (WCAG 2.1), secure frontend development, and state management (NgRx). Experienced in leading Angular modernization initiatives, driving frontend architecture decisions, and mentoring junior engineers. Delivered enterprise and government-grade platforms adopted across 140+ countries, supporting 2,000+ concurrent users in secure, mission-critical enterprise environments.

CORE SKILLS

- **Framework & Library:** Angular (v2–18+), Angular CLI, Angular Material, JSON, jQuery
- **State Management:** NgRx, NgXS, RxJS, Signals
- **Angular Expertise:** Component Lifecycle, Change Detection, Dependency Injection, Standalone Components, Reactive Forms, Angular Interceptors, Route Guards
- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, SASS
- **Architecture:** SPA, Modular Architecture, Lazy Loading, Micro Frontends (Module Federation)
- **Performance Optimization:** Webpack Optimization, Bundle Reduction, Change Detection Strategy (OnPush), Performance Profiling (Chrome DevTools), Memory Leak Detection
- **UI/UX & Accessibility:** Responsive Design, Cross-Browser Compatibility, WCAG 2.1, i18n/L10n, RTL
- **Testing & Tools:** Jest, Jasmine (working knowledge), Git, GitHub, Postman, NPM
- **Frontend Integration:** RESTful API Integration using RxJS
- **Methodologies:** Agile/Scrum, Code Reviews

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS)
Software Engineer - Senior Angular Frontend Developer
April 2021 – Present

- Owned frontend features end-to-end, from requirement analysis and UI design to development, testing, deployment, and production support for enterprise-grade Angular SPAs (Angular 7–18+).
- Designed and maintained scalable Angular applications supporting 2,000+ concurrent users.
- Led technical design discussions and made key decisions on state management patterns, module structuring, and performance optimization strategies.
- Acted as frontend module owner, driving architectural alignment, scalability standards, and long-term maintainability.
- Spearheaded enterprise-wide Angular version upgrade initiative across multiple applications.
- Mentored 3–4 junior developers, conducted code reviews, and enforced coding standards to ensure maintainable and scalable frontend architecture.
- Built reusable, modular UI components and implemented **NgRx-based state management**, integrating RESTful APIs using **RxJS** for asynchronous data handling, error management, and real-time updates.
- Improved frontend stability and code quality by **25%** through unit testing, peer code reviews, and structured debugging practices.

- Reduced page load time by 30% using lazy loading, Webpack optimization, and advanced change detection strategies, improving user engagement and reducing bounce rate.
- Collaborated closely with architects, backend engineers, designers, QA teams, and business stakeholders in Agile/Scrum environments, contributing to estimations, sprint planning, internationalization (i18n/L10n), RTL support, and production releases.

KEY PROJECTS

Project: Automated Traveller Helpdesk for Incoming Tourists & Homebound Indians – (CBIC Government of India)
Role: Senior Angular Frontend Developer
Duration: March 2024 – Present
Technology Stack:
Angular 16+, TypeScript, Angular Forms, Reactive Forms, RxJS, HTML5, CSS3, SCSS, JSON, REST APIs, Git, Agile/Scrum
Project Overview:
National-level digital customs declaration platform used across India, designed to handle high concurrent traffic under strict security and compliance standards.
Responsibilities & Contributions:

- Developed **secure, dynamic Angular forms** with complex validations for customs workflows (baggage, currency, pets, crew).
- Implemented **responsive UI** using modern CSS techniques (SCSS, Flexbox, Grid).
- Used **RxJS** for asynchronous data handling, validations, and API integrations.
- Ensured high performance, usability, and compliance with **government security guidelines**.
- Implemented frontend security best practices including XSS mitigation using Angular DomSanitizer, secure form validation, input sanitization, and token-based REST API integration aligned with OWASP guidelines.

Project: Digital Passport System (Hitachi Energy)
Role: Frontend Developer (Angular Specialist)
Duration: April 2021 – March 2024
Technology Stack:
Angular 7–15, TypeScript, RxJS, NgRx, Angular Material, HTML5, SCSS, REST APIs, Git, GitHub, Agile/Scrum
Project Overview:
Global cloud-based Single Page Application for product lifecycle management, enabling real-time access to critical product and quality data across international teams.
Responsibilities & Contributions:

- Built **scalable, reusable Angular components** for enterprise workflows.
- Implemented **NgRx-based state management** for complex, data-driven dashboards.
- Developed **mobile-first, WCAG 2.1 compliant UI** for accessibility and cross-device support.
- Enhanced dashboard performance and scalability for global users across 140+ countries through NgRx and modular architecture.
- Enabled **multilingual and RTL support**, driving adoption across **140+ countries**.
- Improved application performance using **lazy loading, modular architecture, and optimization techniques**.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science
Amity School of Engineering & Technology, Noida | 2019
